

I wanted you to know that I enjoy listening to XM radio. It is nice not to have change channels as I travel, and I get to listen to my favorite stations wherever I may be.. The traffic and weather channels are important to keep me informed, which is up-to-date and often. I believe that it's important for safety to have this service. I pay for the service and NAB should not dictate what I'm permitted to hear.

Respectfully I urge you to reject NAB's petition 04-160, and support XM's programming that I demand and deserve.
